

CLEAN AIR CARBURETOR CERTIFICATE

This documents that the holder has purchased a Holley carburetor designed to provide appropriate emission connections. To verify the correct application, check the sticker in the engine compartment listing the carburetor part number and correct vehicle application information. The part number listed should match the part number stamped on the carburetor intake assembly.

This statement applies to the carburetor only and does NOT apply to any other emission control device. All other emission control devices must be fully intact and operational to function properly.

NOTE: If no sticker is visible in the engine compartment, the carburetor part number should match the number and application information listed in the Holley catalog.

(This document may be stored in the vehicle's glove compartment.)
