**1 Gallon - 3.785 liters**
Part No. 01227
4/case - Net Wt. 35 lbs.

### MOTORCYCLE

**22 fl. oz. - 650 ml**
Part No. 22220
12/case - Net Wt. 21 lbs.

### DETAILING • CLEANING • PROTECTION

#### DESCRIPTION:
WIZARDS® WIPE DOWN™ is a no-gloss, dual-purpose product. Automotive and motorcycle detailers use the product to quickly remove dust, fingerprints, road grime and oily residue from all matte finishes. Body shop technicians find WIPE DOWN™ indispensable for removing oil and dust residue generated when buffing.

#### BENEFITS:
Matte finishes require a special matte detailer. WIPE DOWN™ is specifically formulated as a no-shine quick cleaner for all matte finishes, including suede, denim, satin primer, powder coat and all flat clears. WIPE DOWN™ can be used to remove streaks and smears from painted surfaces caused by the overuse of waxes, glazes, and detailers. WIPE DOWN™ is used by body shop professionals to remove oily residue during compounding. This allows the user to see what stage the project is in. By removing the oily film, the user can eliminate missed areas and finish the panels, eliminating the need to re-buff after washing the vehicle.

WizardsProducts.com

### FEATURES:
- VOC compliant. WIPE DOWN™ contains no wax, silicone or petroleum solvents.
- No-shine detailer for all matte finishes, including suede, denim, satin primer, powder coat and all flat clears.
- Removes streaks and smears from over use of waxes, glazes, and detailers.
- Removes oil and dust residue generated by compounding and buffing. This eliminates having to re-buff missed areas because of sand scratches being masked by residue.
- Use as a spot wash between compound steps to remove abrasive dust. Doing this eliminates pulling coarser abrasive into the finishing steps.
- Removes oily film and residue.
- Safe for all paint systems and all hard surfaces such as glass and chrome.

### HOW TO USE:
Spray onto surface to be cleaned. Spread out evenly, using a folded MULTI-FIBER™ CLOTH #11420. Wipe firmly to pick up dust, dirt, fingerprints, oily film and residue. Flip cloth to dry side and buff dry.

**HINT:** If a shiny, high gloss and slick feel is desired, use MIST-N-SHINE® Detailer #01214 or SHINE MASTER™ Polish and Sealant #11033.
