EDELBROCK TWO-PIECE ROX & SB2 INTAKE MANIFOLDS
For use with ROX & SB2 Small Block Chevy Cylinder Heads
Part #2847, 2848, 28478 & 28488
TECHNICAL INFORMATION

Part # 2847 and 2848 (Standard Flange):

Due to the popularity of 9.080" deck applications over that of 9.000" deck applications, these intake manifolds are machined to a 9.080" configuration. If used on a lower deck height, additional machining of the flanges may be required for a proper fit.

Part # 28478 and 28488 (+.500 Flange):

Although the standard flange intakes mentioned above are machined to a 9.080" deck configuration, the +.500" intakes are machined in relationship to a true 9.000" deck configuration. The +.500" manifolds are designed to fit applications up to a 9.500" deck. When using a +.500" intake for an intermediate deck application, proper port and manifold alignment can be achieved with additional machining of the flanges.
