

# VHX-60F-FAL

Dakota Digital VHX Instrument Installation  
For 1960-'63 Ford Falcon & Ranchero

Your new VHX-60F-FAL kit includes:

### VHX Display

### Universal Sender Pack

### Switch Assembly

### 36" CAT5 Cable

### (5X) Lock Washers & Nuts

### Control Box

### Ford Adapter

## Installation

1. Remove the stock gauge cluster from the dash and retain the factory hardware for reassembly.

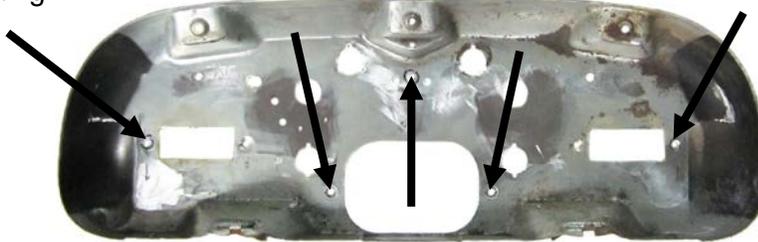

2. Remove the bezel by removing the two screws on the bottom and the one on top. Retain this hardware for reassembly. The bezel and housing along with their related mounting screws will be the only items reused.

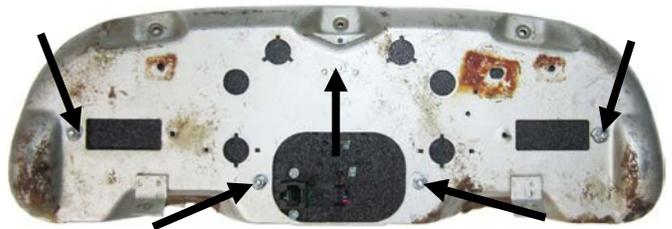

- 3a. The inside of the gauge housing will need to have the lens, gauges, and all the clips removed (front and back) so it is a bare panel only. **ALL INTERNAL GAUGE MOUNTING AND SUPPORT TABS WILL NEED TO BE COMPLETELY REMOVED FROM THE HOUSING AND GROUND FLUSH TO ENSURE PROPER FITMENT. NOTE: DO NOT CUT THE BOTTOM DASH MOUNTING TABS ON THE REAR OF THE HOUSING.**

- 3b. To ease installation of the VHX System into the factory housing; drill out the indicated holes using a 3/16" drill bit. Before installation it is recommended to refinish the housing to prevent bare metal areas from rusting.

4. Carefully place the VHX system into the factory housing while aligning the studs coming out of the VHX system into the holes of the housing that were drilled in the previous step. Use the supplied nuts and lock washers to fasten the items together. Ensure the black ABS subpanel sits flush against the housing.

5. Attach the provided CAT5 cable to the back of the VHX system and carefully route the open end to the control box mounting location before reassembly of the dash.

6. Re-install the gauge cluster to the dash using the factory hardware and refer to the main manual for wiring instructions to complete the VHX installation.
