

LS Coil Sub-Harness 558-321

PN 558-321 is designed to be used as a replacement for factory GM coil sub-harnesses and connects to any GM LSx coil. It can be used with Holley EFI LS main harnesses or any other factory or aftermarket harnesses that use a factory LS coil sub-harness. The harnesses route the main connection to the back of the engine. These connections can also be run back up to the factory connection point in the middle of the engine. Harness are labeled "ODD" and "EVEN". The "ODD" harness connects to cylinders 1-3-5-7. Cylinder 7 is closest to the main connector. The "EVEN" harness connects to cylinder 2-4-6-8. Cylinder 8 is closest to the main connector.
