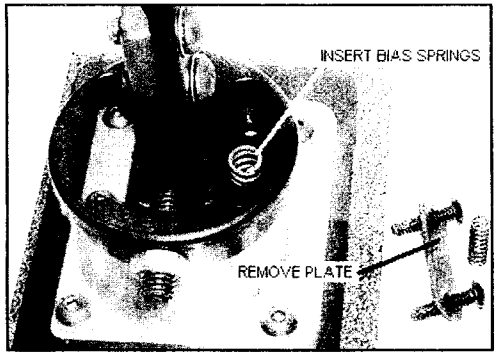
HURST SPRING REPLACEMENT KIT

Fits Billet/Plus Shifters with Bias Springs

INSTALLATION INSTRUCTIONS

1. Remove cover or console from shifter.
2. Make sure the shifter is in the neutral position.
3. Remove the (4) pan head torx head screws that hold the spring retainer plate.
4. Remove the spring retainer plates.
5. Remove the inner springs (#2300068) and the outer springs (#2300067) from the shifter housing.
6. Insert the new inner springs (#2300068) and the outer springs (#2300067) in to the shifter housing.
7. Position the spring retainer plates over the new springs.
8. Apply Loctite Red (#271) to the (4) pan head torx head screws.
9. Evenly tighten down the (4) pan head torx head screws.
10. Torque screws to 20 – 24 in/lbs.
11. Replace the console or cover.



TECHNICAL SERVICE

A highly trained technical service department is maintained by Mr. Gasket Performance group to answer your technical questions, provide additional product information and offer various recommendations. See your local Mr. Gasket Performance retailer for specific prices.
