

**HURST SHIFTER CABLE SUPPLEMENT**

Hurst has made an improved design change in the gear selector cable for this shifter. The new cable supplied is adjustable at the threaded end. Disregard cable installation at transmission oil panbracket and transmission arm in Hurst instruction sheet.

**SHIFTER CABLE INSTALLATION**

1. Insert shifter cable into mounting bracket and secure using clip. Push clip onto cable inside of bracket with tab facing rearward and tap in until fully seated.
2. Install cable pivot onto threaded end of shifter cable. Adjust pivot on end of cable until it slides freely into hole in transmission arm. Lock adjustment by tightening hex nut against pivot. After inserting pivot, secure using cotter pin.

**Note:** It may be necessary to make a fine adjustment of cable pivot before shifter will engage completely.

**TECHNICAL SERVICE**

A highly trained Technical Service Department is maintained by Hurst Performance to answer your technical questions, provide additional product information and offer various recommendations. See your local retailer of Hurst products for specific prices.

For best results, Technical Service calls, correspondence and warranty questions should be directed to the following address:

Phone: (707) 544-4761  
Monday through Thursday 6:00am to 5:00pm PST  
Friday 6:00am to 1:30pm PST
