

INSTALLATION INSTRUCTIONS

Part Number E-4967

This filter fits: See catalog for current applications

* **FREE K&N® decal** To register your warranty, please see us online at knfilters.com/register. **FREE K&N® decal** *

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures **MUST** be followed to ensure the proper fit and seal of the K&N® air filter.

INSTALLATION:

1. Remove the air cleaner cover wing nut. (Fig 1)
2. Remove the air cleaner cover. (Fig 2)
3. Remove the wing nut that retains the stock air filter and discard the stock air filter. Leave the rubber sealing ring on the carburetor inlet in place. Keep the stock wing nut. (Fig 3 and 4)
4. With a damp cloth, clean the air cleaner assembly of any dust or debris.
5. Install the K&N® air filter. Make sure it is seated firmly against the rubber sealing ring on the carburetor inlet. (Fig 5)
6. Install the provided rubber and fender washers on the stock stud.

NOTE: The rubber washer will go against the K&N® air filter. (Fig 6)

7. Tighten the stock wing nut on the K&N® air filter. (Fig 7)
8. Reinstall the stock air cleaner cover and tighten the wing nut. (Fig 8)

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
