

INSTALLATION INSTRUCTIONS

Part Number SU-9094

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N Filtercharger® seals properly.

INSTALLATION

1. Remove the stock air filter.
2. Remove the o-rings from the grooves in the air box where the air filter sits.
Note: The K&N Filtercharger® will not seat properly in the air box with the o-rings in place.
3. Install the K&N Filtercharger® into the air box. **DO NOT FORCE THE AIR FILTER!**
Note: The K&N Filtercharger® will fit in the air box more than one way. The “flat side” of the air filter will be facing down in the air box.
4. Reinstall the air box lid.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
