

Mag Daddy™ has utilized the same Ultra-Strong magnets used in the Aerospace, and automotive industries for the first ever high quality Wire/Cable Management solution. Mag Daddy™ magnets easily stick through oil, grease, paint, and dirt. After placing a Mag Daddy™ Fastener onto a thick piece of steel, i.e. I-Beam, it appears as if it was welded on!

Features:

- Easy Installation
- Plastic
 - Plenum Rated
 - Flammability rating; UL®94: HB
 - Lasts 20x longer than Nylon 6.6
- Ability to Rotate 360 Degrees
- Reusability
- Take in and out wires

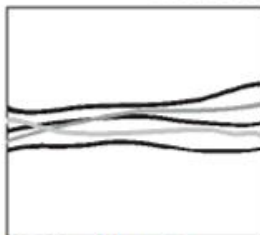

*Above pictures are securing **12** unshielded cat 5e Cables to Pipe*

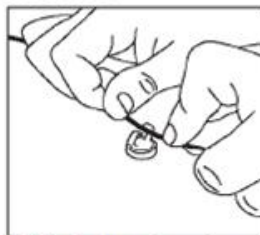

Locations: Steel, Beams, Purlins, Ceiling Decks, Drop Ceiling Channels, Metal Joists, Metal Washer, etc.

Mag Daddy™ Fasteners are quickly gaining acceptance, and are being used in securing Low Voltage cabling, Temporary Wiring, Air Hoses, Wires along Panel Boxes for that clean finish, holding down Hydraulic lines, and inside various products of manufacturers.

INSTRUCTIONS FOR USE

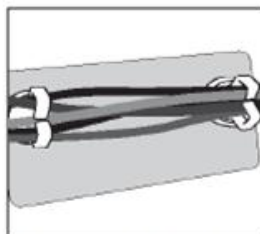

1. Problematic loose wires.

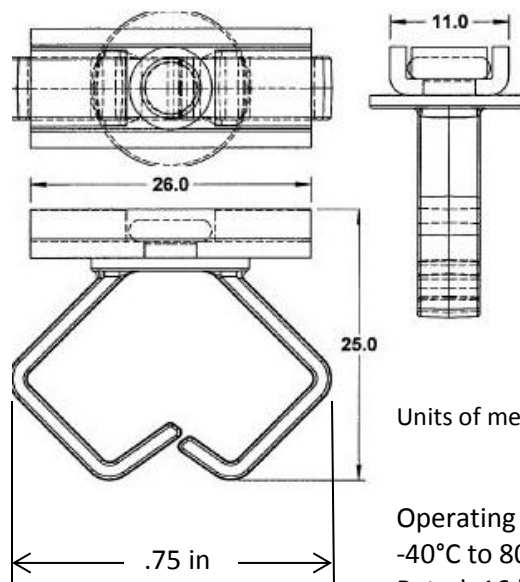

2. Slide wires into gripper claws

3. Fasten multiple wires/cables with multiple fasteners as needed.

4. Attach magnetic end to metal surface.

Units of measure in mm

Operating Temperature:
-40°C to 80°C
Rated: 16 lbs
