

Dyno Test F • Comparing a Professional Products #52020 Typhoon manifold for the SB Chevy to an Edelbrock #7101 Performer RPM.

There is not a lot of difference in these two manifolds in this test. Fortunately the Professional Products Typhoon came out on top by a slim margin. While the peak power is almost the same because the Typhoon took a dip at the top, it actually made more power everywhere else. But the big difference is price. The current Summit manifold lists the #7101 at \$141.95. The Typhoon is typically priced lower than the Edelbrock.
