SwaY Bar for 1935-40 and 1942-48 Composite Leaf Rear Suspension Kit

**PLEASE READ INSTRUCTIONS COMPLETELY
BEFORE BEGINNING INSTALLATION**

This sway bar is designed to work with the 910-49935 and 910-49942 Composite Leaf Rear Suspension Kits for 1935-40 and 1942-48 Fords.

- 1) The flat anti-roll bar frame brackets bolt to the frame using the mounting holes from the original lever shocks. Attach them with the supplied carriage bolts and nuts.

NOTE:

Some '42-'48 models or other applications such as an aftermarket or large fuel capacity fuel tank may require that the stepped mount brackets (916-43504) be installed in lieu of the flat frame bracket in order to provide adequate clearance for the sway bar.

- 2) Apply lube on the ID of the bushing. Install the poly bushings on the straight portion of the sway bar. Position the bushings outboard near the bend in the sway bar. Place retainer U-straps over bushings with flat side facing up.
