

CONTAINS  
12 SILVER 60°  
12 BLACK 90°  
Easy Instructions  
Included

Model 14 F  
for 14mm flat seat spark plugs only.

# SHIMDEX™

THE STACKABLE SPARK PLUG INDEXING SHIMS

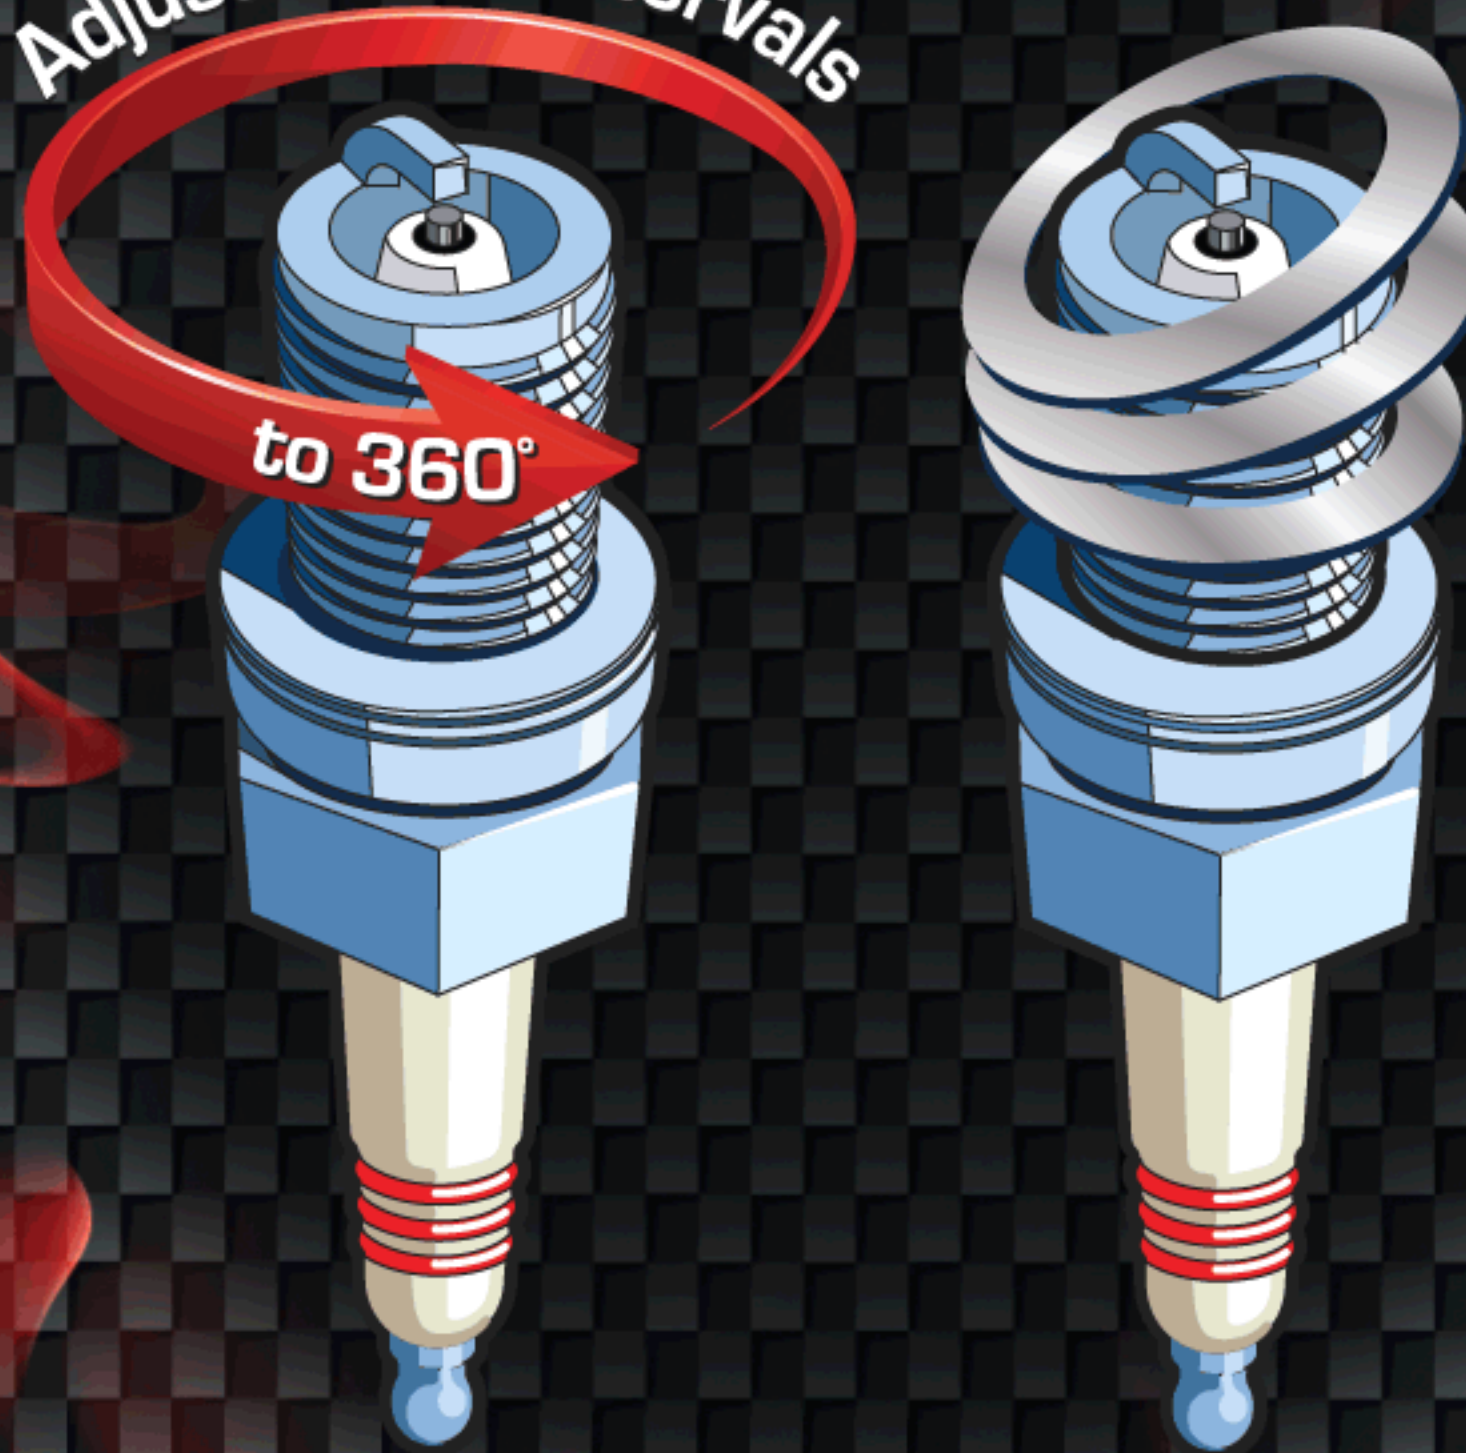

PATENT PENDING

## Indexing Your Spark Plugs Has Never Been This **EASY** or **EFFECTIVE!**

*Indexing your spark plugs increases power and provides crucial clearance between the spark plug and piston.*

Adjust at 30° Intervals

*Shim-Dex shims rotate the ground of the spark plug at 30° intervals anywhere within 360°*

*You won't have to buy extra spark plugs to have them perfectly indexed AND Shim-Dex shims are **REUSABLE** many times over.*

# THINK THIN!

*Intended  
For High  
Performance  
Engines*

- Minimal or no thread exposure in the cylinder head that can overheat and cause pre-ignition.
- Shim-Dex shims are *so thin* they will not adjust the gap too far out of the combustion chamber and negatively effect performance.
