

Engine Repair Head Sets (HS)

Problem-Solving Convenience

Fel-Pro[®] Head Sets give technicians not only the gaskets the project requires, but the very best technology available.

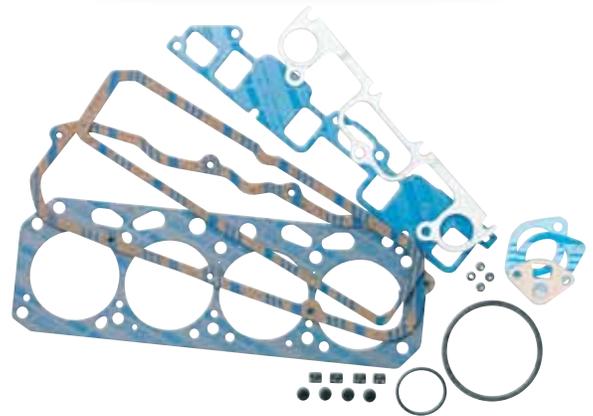

Head Sets are used for upper engine repair only, typically on a valve grind. They can be combined with a Fel-Pro Conversion Set (CS) to form a Full Set (FS) for the entire engine.

PermaTorque[®] Head Sets

PermaTorque Head Sets feature the famous PermaTorque head gaskets, with proven technology that:

- Features exclusive coatings
- Eliminates the need for retorquing
- Solves bi-metal engine “scrubbing” problems
- Seals small surface imperfections

PermaTorque[®] MLS Head Sets

PermaTorque MLS Head Sets give technicians all the parts they need for MLS head rebuilding and installation. Just as important, Fel-Pro offers more coverage than any competitor. These sets include PermaTorque MLS head gaskets featuring:

- Full-hard stainless steel material that maintains its shape and compensates for expansion and “scrubbing” action
- Strategically placed sealing beads that eliminate leak paths
- Extra-strong “stopper” layer that provides a superior primary combustion seal
- Unique aftermarket coating that enhances sealability
