PRESS RELEASE

Quarter Master® Race Clutch Hydraulic Fluid

The leading name in clutch technology introduces full synthetic hydraulic clutch fluid engineered to deliver performance and protection in high temperature race applications

Quarter Master® Race Clutch Hydraulic Fluid is specially formulated to maintain viscosity (thickness) in extreme temperature race and hardcore performance applications that have traditionally specified DOT 3 hydraulic brake fluid.

Engineered by Quarter Master® and Endure Performance Lubricants™, the full synthetic Race Clutch Hydraulic Fluid is designed to deliver superior performance and protection by maintaining its viscosity in high temperature applications, which provides a solid pedal feel and consistent pedal actuation. Containing a proprietary mixture of lubricants and corrosion inhibitors, Quarter Master® Race Clutch Hydraulic Fluid works with all brands of clutches and types of components and is specifically engineered to maximize the life of all seals and o-rings in the clutch master cylinder and throw-out bearings.

Quarter Master® Race Clutch Hydraulic Fluid is available in individual 12 oz. bottles or in cases of 12 bottles each. Quarter Master® will also provide one 12 oz. bottle with every bellhousing kit and release bearing purchased.

For more information about the Quarter Master® Race Clutch Hydraulic Fluid or any other product, call us at 1-888-258-8241, or visit us online at www.quartermasterusa.com.

#30100

Quick Summary

Product: Quarter Master® Race Clutch Hydraulic Fluid
Part Number: #30100 (12 oz. Bottle); #30100CS (Case of 12 Bottles)

Features & Benefits:

- Maintains viscosity in high temperature applications, providing solid pedal feel & consistent pedal actuation
- Designed for demanding race & performance applications, high temperatures & maximum endurance
- Engineered to maximize the life of all seals & o-rings in the clutch master cylinder & throw-out bearings
- Works with all brands of clutches & types of components
- Available in individual 12 oz. bottles or cases that contain (12) 12 oz. bottles each
