

DynaPad™

HEAVY-DUTY HEAT & NOISE BARRIER

DynaPad is a heavy-duty composite barrier providing maximum acoustical attenuation and excellent thermal insulation. DynaPad utilizes "Dissimilar Layer Insulating" technology that solves two of the most difficult automotive problems; exhaust system heat and low frequency noise. Easy to install, DynaPad can be used in place of carpet pad and is oil and water resistant. Use DynaPad on floors, interior firewalls, rear decks and in trunks for cool, quiet comfort. For optimal results, apply DynaPad over Dynamat Xtreme.

HOT CARS BECOME COOL!

NOISY CARS GET QUIET!

FOR USE ON FLAT INTERIOR SURFACES

**KILL LOW FREQUENCY

HOODLINER

DYNAPAD

Apply **The Hoodliner** to the underside of your hood to absorb engine noise and control heat. If a black finish is desired, **Dynaliner** can be used. Both products are heat resistant.

Replace **Dynaliner** with **DynaPad** on floor, firewall and trunk floor when a heavy duty barrier is needed. Common applications include: high performance exhaust noise & car audio installations.
